MACHINE IDENTIFICATION Caterpillar machines are identified with SERIAL NUMBERS. Serial numbers are assigned to the chassis and to the engine. The chassis and the engine also carry ARRANGEMENT NUMBERS and in some cases MODIFICATION NUMBERS. These numbers are shown on the serial number plates and on the master plate in the operator's compartment. For the location of the serial number plates, refer to the Specification Section at the back of this Parts Book.

Caterpillar dealers need these numbers to determine which components were included on the machine when it was assembled at the factory. This permits accurate identification of replacement part numbers.

ORDERING PARTS Quality Caterpillar Replacement parts are available from Caterpillar dealers throughout the world. Their parts stocks are up to date and include all parts normally required to protect your investment in Caterpillar machines. Wh ordering parts, your order should specify the quantity, part number, part name and the se number, arrangement number and any modification numbers of the machine for which parts are needed. If in doubt about the part number, please provide your dealer wit complete description of the needed item.

HOW TO USE THE PARTS BOOK Caterpillar Parts Books include illustrations of the groups or assemblies which make up the machine. These illustrations show the standard components plus many of the attachments available for the machine.

The alphabetical index located in the front part of the book should be used to determine the page number on which specific illustrations are shown. Reference to those pages will identify each of the individual serviceable parts.

Captions The caption under each illustration identifies the part number and name of the group or assembly shown. If more than one illustration is included for any group, the caption identifies the specific machine serial numbers to which each illustration applies. In some cases it is not possible to determine the specific machine serial numbers to which different illustrations are applicable. In those cases the caption identifies the illustration as "First Type", "Second Type", etc. Reference to the actual group or assembly is necessary in those cases to determine which illustration should be used.

Captions provide additional information such as page numbers where illustrations of sub assemblies are shown, information reguarding quantities used and other information intended to assist the user in determining parts needs.

Indented Part Names Within each illustration i parts list identifying each viceable part in the illustrat When a part name is indented in this lis means that serviceable item is a part of serviceable item under which it is inden

Note: Continuing improvement and advancement of product design may cause changes to your machine which may not be included in this publication. Each publication is reviewed and revised, as required, to update and include these changes in later editions.

Whenever a question arises regarding your Caterpillar product, or this publication, please consult your Caterpillar dealer for the latest available information.

COMO PEDIR PEÇAS Peças de Reposição de Qualidade Caterpillar são obtidas através dos revendedores Caterpillar em todo o mundo. Seu estoque de peças é atualizado e inclui todas as peças normalmente requeridas para garantir o seu investimento em máquinas Caterpillar. Quando pedir peças, use sempre o catálogo de peças que cubra o número de série de sua máquina. O seu pedido deverá especificar a quantidade, o número da peça, o seu nome e ainda indicar o número de série da máquina para a qual a peça é requerida. Quando estiver em dúvida quanto ao número da peça, forneça ao seu revendedor uma descrição completa do item requerido.

COMO USAR O CATÁLOGO DE PEÇAS Os catálogos de peças Caterpillar incluem ilustrações dos grupos ou conjuntos de que se compoem as máquinas. Estas ilustrações mostram os componentes standard e também alguns dos acessórios disponíveis para as máquinas. O índice alfabético localizado no início do catálogo deve ser usado para determinar o número da página na qual uma determinada ilustração será encontrada. Uma pesquisa nestas páginas servirá para identificar cada uma das peças individuais vendáveis.

Títulos das ilustrações

O título de cada ilustração identifica o número e o nome do grupo ou conjunto mostrado. Se mais de uma ilustração for necessária para um determinado grupo, o título da ilustração mostrará o número de série do qual cada ilustração se aplica. Em alguns casos não é possível determinar especificamente o número de série para o qual as diferentes ilustrações são usadas. Neste caso, o título identificará a ilustração como, "Primeiro Tipo", "Segundo Tipo", etc. Uma pesquisa junto ao grupo em questão se torna então necessária para determinar qual a ilustração a ser usada.

Os títulos fornecem ainda informações adicionais, tais como: números de páginas onde ilustrações de sub conjuntos são encontrados, informações sobre quantidades usadas e outras informações que possam ajudar a determinar os requisitos sobre peças.

Nomes de Peças Fora do Alinhamento

Em cada ilustração existe uma lista de peças identificando cada peça vendável do conjunto. Quando o nome de uma peça é colocado fora de alinhamento nesta lista, isto significa que este item vendável é componente do item vendável que o precede.

Nota:

O contínuo processo de desenvolvimento e melhoria dos projetos dos produtos, pode ocasionar mudanças em seu equipamento que não estejam ainda incluídas neste catálogo. Cada edição é revista e revisada, quando necessário, para atualizar e incluir estas modificações em edições futuras.

Quando em dúvida sobre o seu produto Caterpillar, ou esta publicação, consulte o seu revendedor Caterpillar para obter a última informação disponível.
